Apologies for the extreme close up!

That's the machine working it's magic, I didn't find it at all uncomfortable, it just felt like a gentle tap on the face.

Immediately afterwards 😂😂

Sorry, I felt pretty sleepy! My skin felt very soft and smooth. The slight redness had gone pretty immediately and there was definitely a glow. Obviously you need a course to maximize effects but I was pretty impressed with one go!

That's some machine!!! The idea behind endermologie is that its the only non-invasive mechanical skin stimulation technic that naturally reactivates cell metabolism....all very scientific stuff!!!

It's all about naturally boosting collegan, elastin and hyaluronic acid.
