LPC endermologie is currently enjoyed by over 300,000 people around the world on a daily basis and has finally landed here in the UK. endermologie is passionate about its fight for natural beauty and being the best version of yourself as opposed to using invasive procedures such as cosmetic surgery. Instead, the treatment gives your body a little nudge to boost the production of collagen, elastin and hysluronic acid. This arreals to me as I'm a wimp when it comes to to oncept of surgery! Enternol. #grigtt

Endermologie works by using a motorised treatment head to apply a pleasant but intense stimulation to the surface of the skin to trigger the natural physiology of the skin cells, boost the metabolism and stimulate the functions to improve the quality and appearance of the skin from within. It's noisy but it feels good!

#gift

@LPCENDERMOLOCIE_UK @THESECRET.SPA I have to say that my skin genuinely feels and looks so much better. All finished off with a cup of LPG Endermologie herbal tea too.

Thankyou for a lovely experience and glowing hydrated and firmer skin! Plus some fabulous pampering gifts and excellent skincare advice
