## LPG ENDERMOLOGIE IS A 100%

**NATURAL**, non-invasive, non-aggressive mechanical massage treatment designed to improve the appearance of the skin. The treatment, which is applied via a motorised treatment head, applies an intense but pleasant stimulation to the surface of the skin to stimulate and boost the production of key substances in the skin cells – the collagen, elastin and hyaluronic acid – to result in smoother, firmer and rejuvenated skin.

The treatments are entirely non-invasive and completely pain-free. This means that there is no preparation or recovery time needed and smoother, firmer and healthier skin can be achieved in your lunch break!

LPG endermologie's treatments can be applied to different areas of the body to achieve varying results – face, hands, décolletage and body (tummy, thighs and bum).

LPG endermologie's facials start at £60.

## FACIAL TREATMENTS

Different facials:

### **Purify, 45 minutes**

The natural solution to visibly fresher skin. Incorporating a combination of natural facial massage techniques, the treatment eases lines whilst also toning and improving the skin's overall complexion, reduces puffiness in the face – all whilst letting you truly relax and refresh.

### **Glow – 45 minutes**

A highly effective treatment designed to rapidly refresh the skin and give it that beautiful glow we all recognise from post-summer holidays. LPG's technology mechanically exfoliates the skin to reveal a brighter appearance.

Great for a 'quick fix' before a big event or holiday to fix uneven tones and a dull complexion.

### **Re-birth and detox – 1 hour**

A comprehensive procedure perfect for all skin types to unify the complexion, tightens pores and smooths out the face and neck with a 'new skin' effect. An intensive LPG facial workout targets and boost cell turnover and helps restore the skin's natural production of essential rejuvenating substances.

### **Night on the town – 45 minutes**

The perfect pre-event treatment. Using LPG's mechanical stimulation technique, the treatment stimulates the skin's naturally occurring substances including collagen, elastin and hyaluronic acid. The procedure thus densified tissue to reveal a plumper, smoother face, décolleté and bust.

## DECOLLETAGE

Our chests produce far less oil than our faces and tend to be neglected as part of our skincare routine, even though they are exposed to just as much sun. Therefore, after a summer of beachy holidays and alfresco cocktails, the skin

on our décolletage often becomes dry and loose and fine lines that weren't visible before tend to appear.

Rather than having to apply lotions and potions to this larger area of skin, LPG

endermologie has developed a unique way to treat these skin complaints with a simple electronic massage, personalised to each person and their skin type. The mechanical treatment head gently – but nonetheless effective – pulls and massages the skin, giving it a workout, to boost collagen and hyaluronic acid smooth and firm the skin.

Available in locations up and down the country as a 20-minute treatment, the signs of summer can be reversed in a lunch hour from £40.

## BODY TREATMENT

endermologie's body treatments, which are designed to target cellulite, resistant fat, promises visible results within the first three sessions, each of which last up to forty minutes.

100% natural, non-invasive and non-aggressive, endermologie's mechanical treatments, which administer a massage and suction motion, provide an intense but pleasant stimulation to the surface of the skin that improves the appearance from within by regenerating and mobilising damaged cells, boosting the skin's metabolism and re-densifying the firmness of the skin.

endermologie®'s treatments are also now completely bespoke to each individual. The new technology can carefully consider the skin quality and the areas that demands help the most, with individual's being able to choose which areas to treat and for how long.

LPG endermologie recommends six to 12 treatments for the very best results, promising results after the first three.
